

## **Sprint 3 Report, TSR Assistant, Drowning with Ducks, 11/19/17**

### **Sprint 3 Ends 11/19/17**

**Actions to stop doing:** The team should stop over stepping task boundaries so that no one team member is overloaded with work while others are left with little to do.

**Actions to start doing:** The team should have more frequent code reviews so that areas the coder missed may be reviewed by fresh eyes and new/better ideas can be formulated for more efficient code.

**Actions to keep doing:** Honest and open communication on clarifications, problems, and frequent commits should be continued as free communications has been immensely helpful in troubleshooting and resolving any issues with tasks quickly.

### **Work completed/ not completed:**

#### **Completed:**

- **User Story 2** (As an instructor I would like to see an overview of the team's health)
- **User Story 3** (As a developer, I would like to refactor and refine our analysis and flags)
- **User Story 4** (As a developer, I want to know what my limitations are on frameworks for rendering of data)
- **User Story 5** (As an instructor, I want to see a graphical representation of the team's status)
- **User Story 6** (As an instructor I would like to have a flagging system I can manage.)

#### **Not completed:**

- **User Story 1** (As an instructor I would like to see an overview of the team member's health )

### **Work Completion Rate:**

- 5 user stories completed. 1 user story uncompleted.
- 37 estimated ideal work hours completed.
- 14 day sprint.
- .357 of a user story completed per day.
- 2.86 ideal work hours per day.
- Burn Up Charts available in the repository
